Algorithms & Problem-Solving

Level 1

Problem #18

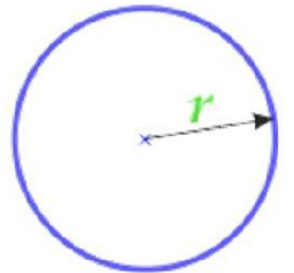

Problem #18

Write a program to calculate circle area then print it on the screen.
The user should enter: r

Example

Inputs: 5

Outputs: 78.54

$$Area = \pi \cdot r^2$$

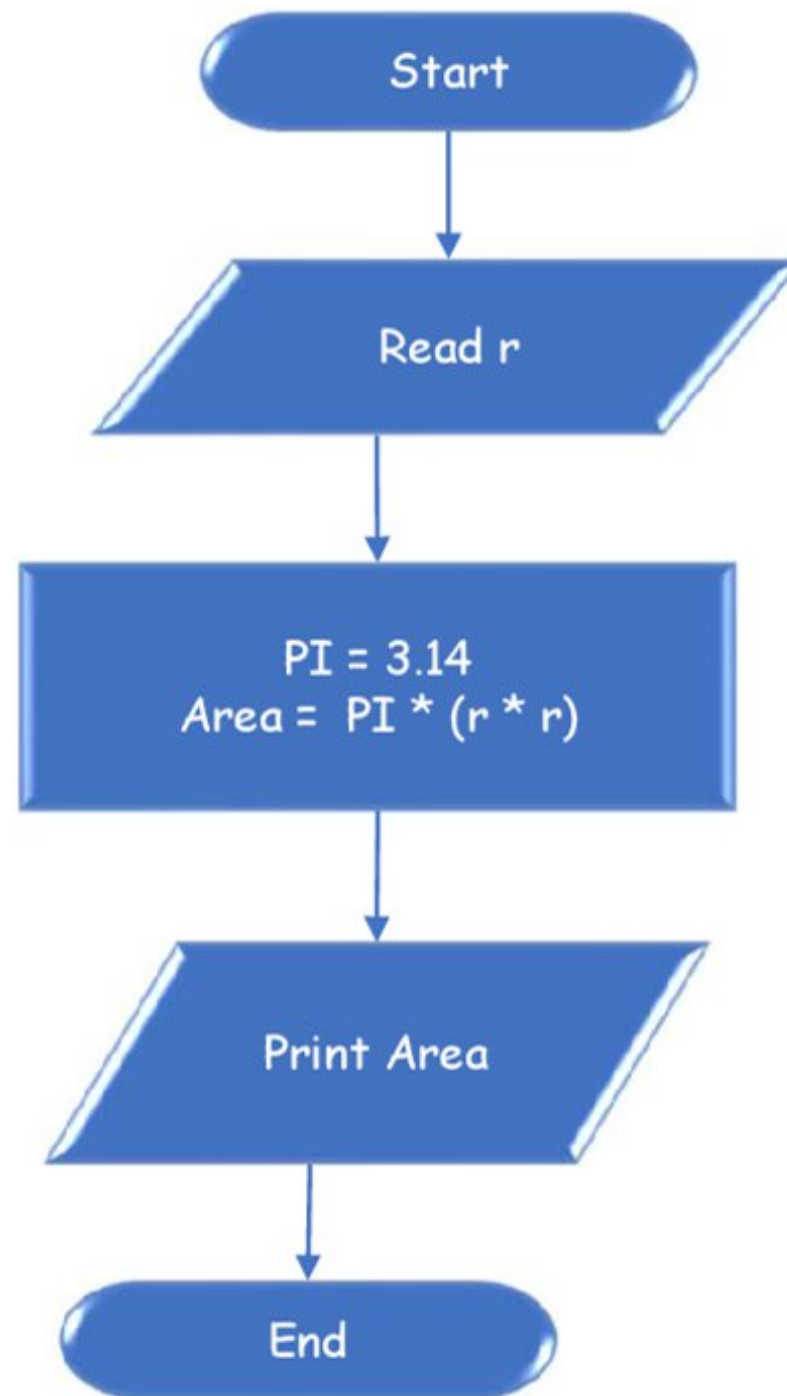

The background of the slide is a photograph of a large, modern interior space, possibly a library or a large hall. The ceiling is a complex, vaulted structure with many thin, dark lines radiating from a central point, creating a star-like or web-like pattern. The floor is made of light-colored tiles. In the lower part of the image, the silhouettes of several people are visible, some standing and some sitting, looking towards the center of the room. The overall lighting is dim, with the main light source coming from the ceiling.
