Algorithms & Problem-Solving

Level 1

Problem #19

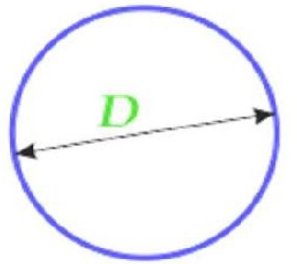

Problem #19

Write a program to calculate circle area through diameter, then print it on the screen.
The use should enter: D

Example

Inputs: 10

Outputs: 78.54

$$Area = \frac{\pi \cdot D^2}{4}$$

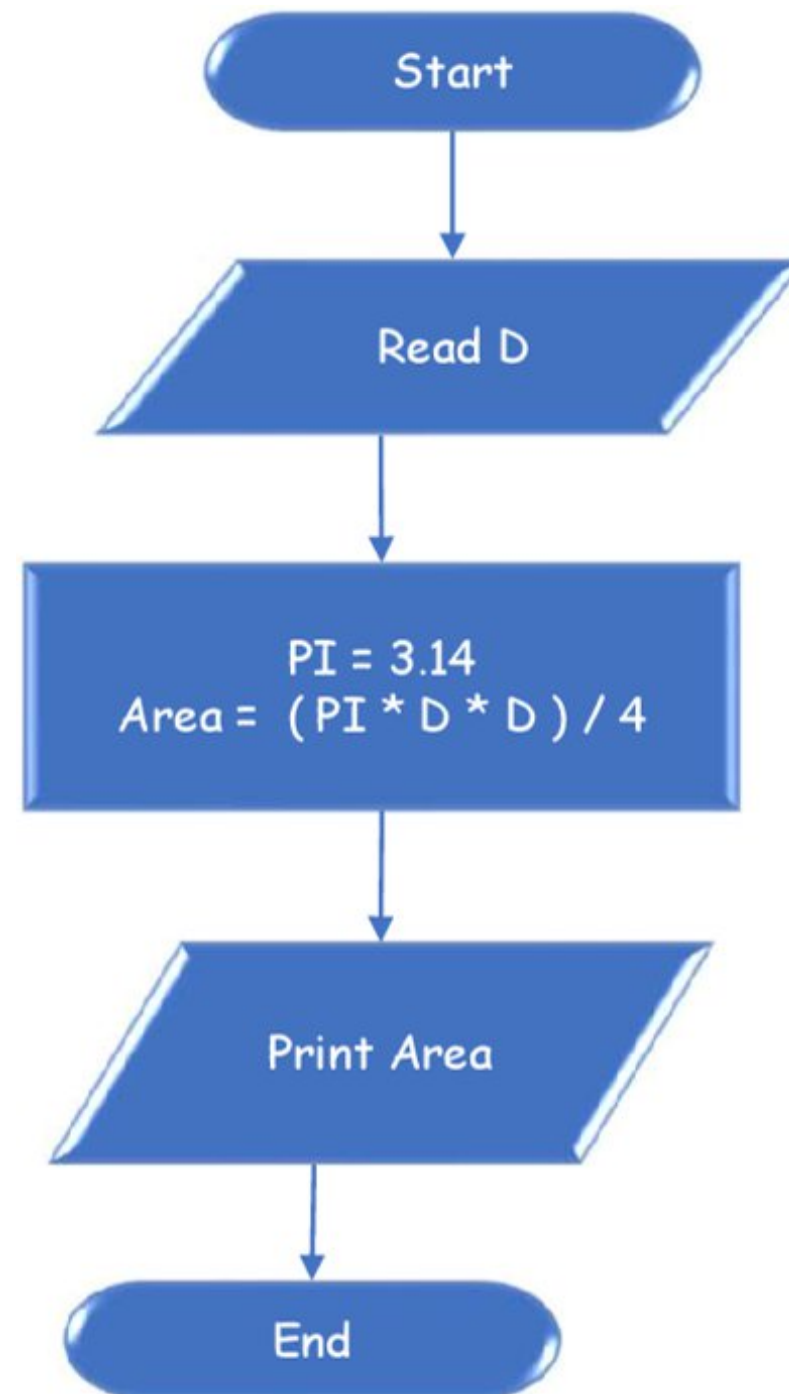

The background of the slide is a photograph of a large, modern interior space, possibly a library or a large hall. The ceiling is a complex, vaulted structure with many thin, dark lines radiating from a central point, creating a star-like pattern. The floor is made of light-colored tiles. In the foreground, the silhouettes of several people are visible, looking towards the ceiling. The overall lighting is dim, with the ceiling being the primary light source.
