

Algorithms & Problem Solving Level 1

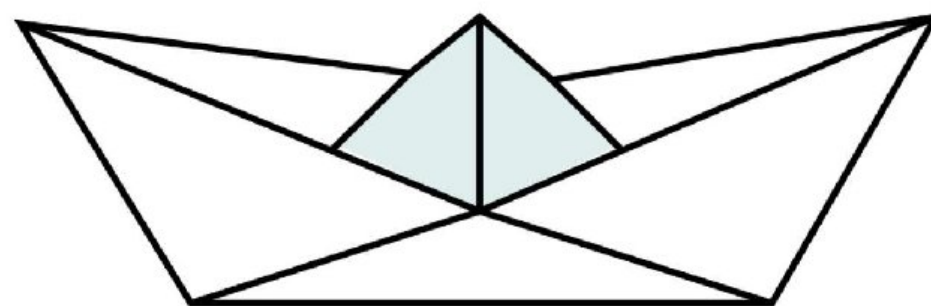

What is Algorithm?

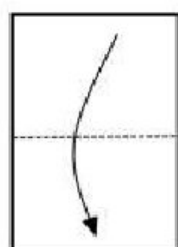

Algorithms & Problem Solving

Level 1

What is Algorithm

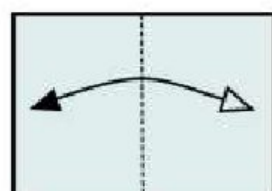

1

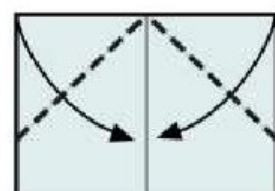

Start from a rectangle (ex. A4).
Fold in half.

2

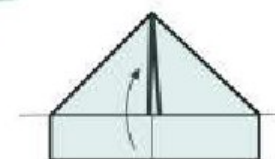

Fold in half and unfold.

3

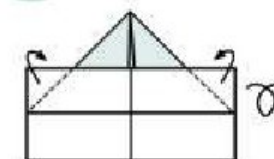

Fold to the center.

4

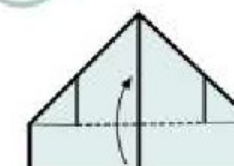

Fold the overlapping strip upwards.

5

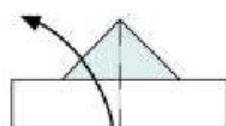

Fold corners backwards. Turn over.

6

Fold strip upwards.

7

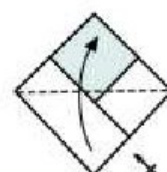

Open.

8

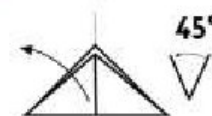

Opening in progress.

9

Fold triangle upwards.
Repeat behind.

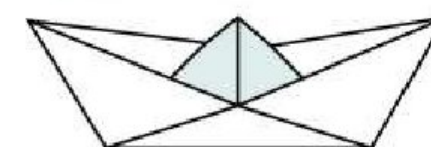

10

11

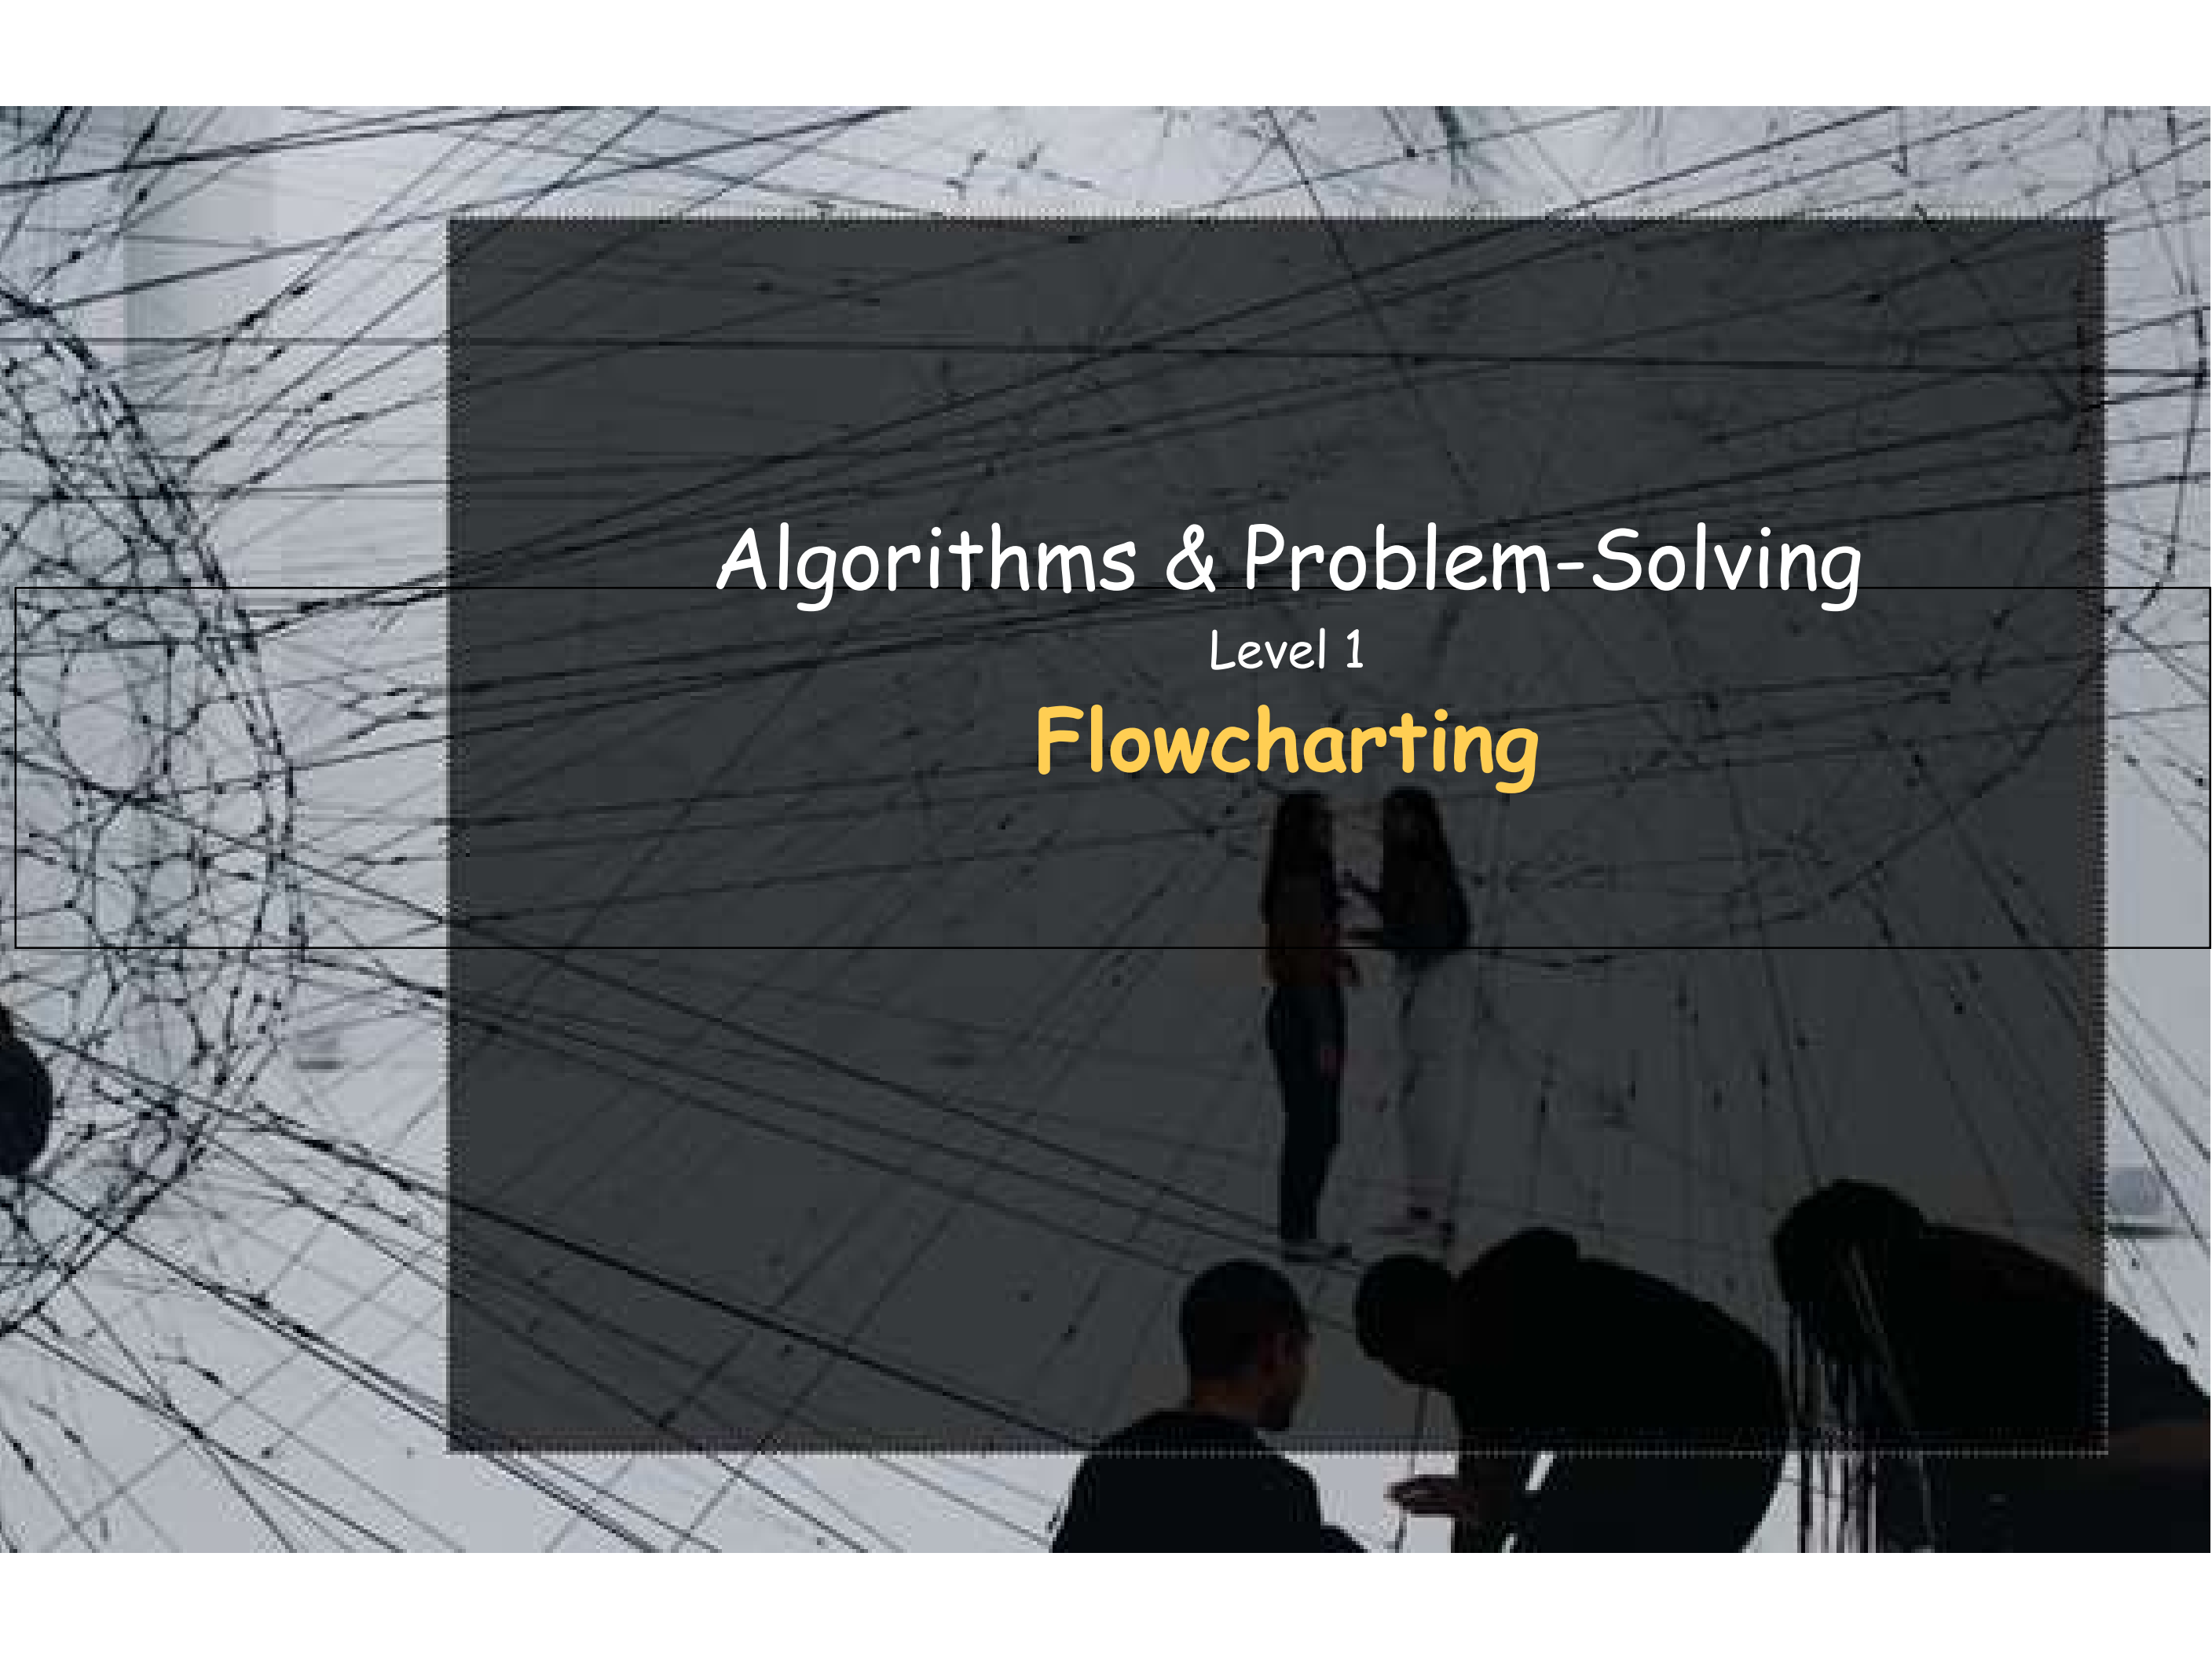

12

What is Algorithm?

Algorithm is a **step-by-step instructions** in order to solve a problem or perform a task.

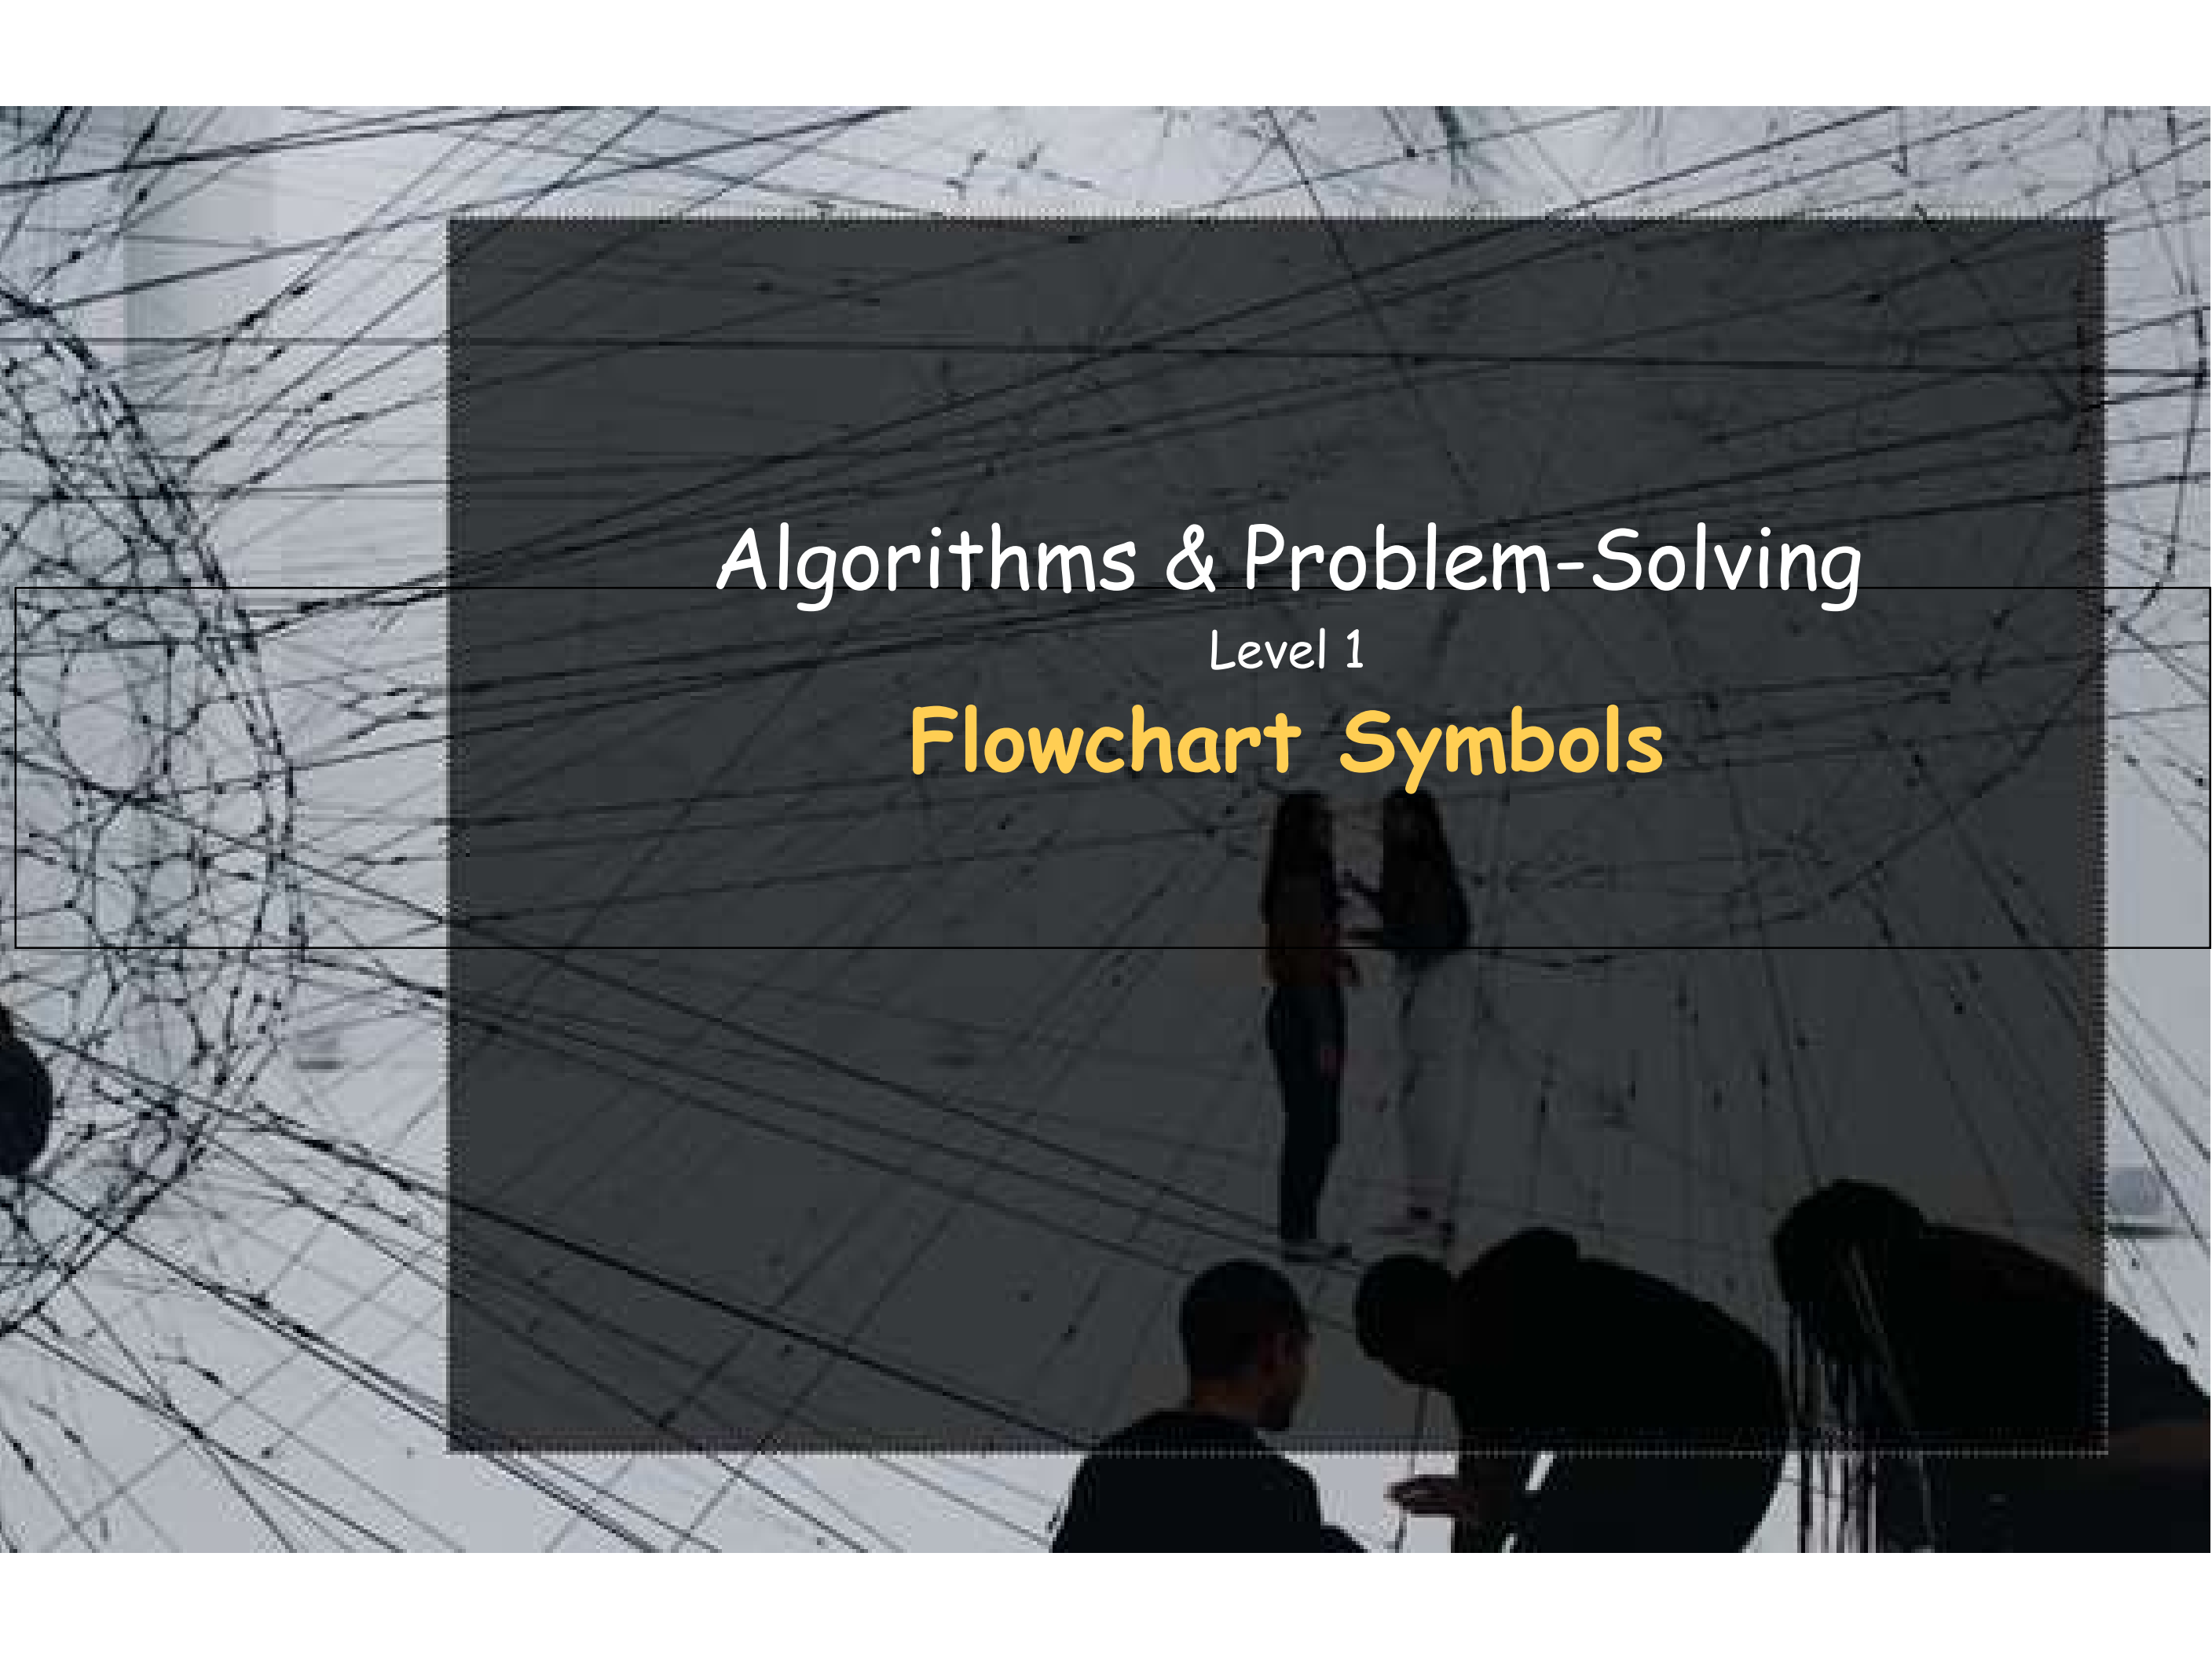

Algorithms & Problem-Solving

Level 1

Flowcharting

What is Flowchart?

Flowchart is a programming design tool that uses graphical elements to visually depict the flow of logic within a program.

The background of the slide is a photograph of a large, modern interior space, possibly a museum or a large hall. The ceiling is a complex, geometric structure with many thin, dark lines radiating from a central point, creating a star-like or web-like pattern. The floor is light-colored and reflective. In the foreground, the silhouettes of several people are visible, looking up at the ceiling. The overall lighting is dim, with the ceiling structure being the main light source.

Algorithms & Problem-Solving

Level 1

Flowchart Symbols

Flowchart symbols

Symbol	Used For
	Used for Start and End
	Used for Input or Output
	Used for process/operations/calculations
	Used for asking a question and making a decision.
	Flow lines with arrows to connect the various flowcharting symbols

Thank you 😊
