Transsion Control Protocol (TCP)

Who is responsible for this?

Packet2

Packet1

TCP Transmission Control Protocol

Packet2

Packet1

TCP: **T**ransmission **C**ontrol **P**rotocol Responsible for:

- TCP defines how applications can create channels of communication across a network.
- It also manages how a message is assembled into smaller packets before they are then transmitted over the internet. and reassembled in the right order at the destination address.

BUT!!!

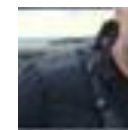

Something is missing!!

How Computers Know the address of each others?

Packet2

Packet1

Will answer you in
the coming lessons 😊

Thank you 😊
