

Computer Foundations Level 2

The background of the slide features a complex, abstract network of thin, dark lines crisscrossing over a lighter, textured surface. In the lower portion of the image, there are dark silhouettes of several people, likely in a meeting or collaborative work environment, looking towards a central point. A large, dark, semi-transparent rectangular box is centered over the image, serving as a backdrop for the text.

Computer Foundations

Level 2

**What is Business
Intelligence?
and what is Cube?**

If I can't measure it,
I can't manage it...

Business Intelligence (BI)

Common Pain..

- Business data is distributed across the enterprise.
- Data everywhere, information nowhere.
- Takes too long - wasted resources/efforts.
- So many excuses - Why I just can't get it to you when you want it.
- Different users have different needs:
 - ❖ Excel versus PDF
 - ❖ Pull versus push
 - ❖ On demand - on schedule
 - ❖ Your format - My format

Example:

You can see the total number of products sold ever.

Example:

You can see the total number of products sold ever.

The total number (200) is divided among the individual products.

Example:

Adding the "Time" dimension to it.

Example:

Adding the "Customer" dimension.

1st scenario:

The following cube will be used to Answer the following example scenarios

1st scenario:

How many products purchased by customer-D in March?

1st scenario:

Grouping Dimensions.

2nd scenario:

How many "Category2" products in Italy 1 Quarter sold?

So the Cube is:

What is Business Intelligence

- Looking for information?
- BI transforms raw Data into valuable Information.
- Information can be transformed into knowledge through discovery.

Business Intelligence (BI) is about getting the right information, to the right decision makers, at the right time.

What is Business Intelligence

- BI is an enterprise-wide platform that supports reporting, analysis and decision making.
- BI Leads to:
 - ❖ Fact-based decision making not assumption-based decision making.
 - ❖ “Single version of the truth”

Why BI? The Five Questions

What happened?

Management Reporting, Financial and Consolidation

Past

What is happening?

Dashboard

Present

Why did it happen?

Analytics

What will happen?

Future

Forecasting

What do I want to happen?

Planning and Budgeting

Data

ERP

CRM

SCM

3Pty

Others

Benefits..

- Give user the means to make better decisions.
- Leverage your investment in your legacy systems (e.g. ERP) or data warehouse, it is the best way to get value from existing applications.
- Challenge assumption with factual information.
- Eliminate report backlog and delays.
- Find root causes and take action.
- Identify waste resources and reduce cost.
- Improve operational efficiency.
- Creates organizational language.
- Negotiate better contracts with suppliers and customers.
- Improve strategies with better marketing analysis.

BI Tools

Tableau

SAP BusinessObjects

Power BI

Oracle BI

Qlik Sense

IBM Cognos Analytics

Excel (Pivot Tables)
