

The background is a blurred image of a computer monitor. On the left, a calculator application is visible with its numeric keypad and function buttons. The main area of the screen shows a code editor with lines of text in various colors (blue, green, white) on a dark background, typical of a programming IDE. At the bottom, a taskbar with several application icons is visible.

NumericUpDown

C#

Level 1

NumericUpDown

Definition

NumericUpDown Control

 Windows Forms control that allows the user to select a numeric value using up and down buttons.

 The value can be limited using minimum and maximum settings.

Explanation

ValueChanged Event

-  Triggered whenever the NumericUpDown value changes.

-  The current value is accessed through `numericUpDown1.Value`.

Label Update

-  The selected value is displayed in `label1` using string interpolation.

Procedure

1. Add a NumericUpDown control to the form.
2. Connect its ValueChanged event.
3. Get the current value using numericUpDown1.Value.
4. Display the value in label1.
5. Change the value using the up or down buttons.
6. The ValueChanged event updates the displayed value.

💡 Example

```
private void numericUpDown1_ValueChanged(object sender, EventArgs e)
{
    label1.Text = $"Value: {numericUpDown1.Value}";
}
```

➡ Result

Value: 0

Value: 5

Value: 10

Note

- ◆ Value represents the current numeric value.
- ◆ Minimum and Maximum define the allowed range.

Comparison

NumericUpDown

- ✓ Selects a numeric value using up/down buttons.
- ✓ Uses Value to access the current value.
- ✓ Uses ValueChanged to detect changes.

TrackBar

- ✓ Selects a value using a slider.
- ✓ Uses Value to access the current value.
- ✓ Uses Scroll to detect changes.

⊘ Warning

◆ The ValueChanged event must be connected to the NumericUpDown for the event code to execute when the value changes.

✦ Summary

- ✓ `NumericUpDown` → selects a numeric value.
- ✓ `Value` → gets the current value.
- ✓ `ValueChanged` → detects value changes.
- ✓ `Label.Text` → displays the selected value.

Thank you 😊
