

The background is a blurred image of a computer monitor. The screen displays what appears to be a code editor with various lines of code in different colors (blue, green, white) on a dark background. At the bottom of the screen, a taskbar is visible with several application icons, including a web browser, a file explorer, and some development tools. The overall image has a soft, out-of-focus quality.

MenuStrip

Definition

MenuStrip

-  Windows Forms control used to create the main menu at the top of a form.
-  Contains menu items such as File, Edit, Clients, and Help.

ToolStripMenuItem

-  Represents an individual menu item.
-  Can contain submenu items and respond to events such as Click.

Procedure

1. Add a MenuStrip to the form.
2. Create menu items such as Find Client, Add New Client, and Logout.
3. Create a Click event for each menu item.
4. Add the required code inside the event handler.

💡 Example

```
private void findClientToolStripMenuItem_Click(object sender, EventArgs e)
{
    MessageBox.Show("Find Client is here");
}
```

➡ Result

Clicking Find Client displays:
Find Client is here

🔍 Most Used Properties

■ MenuStrip

- ▨ `Items` → Gets the top-level menu items.
- ▨ `Dock` → Controls the MenuStrip position.
- ▨ `BackColor` → Sets the background color.
- ▨ `ForeColor` → Sets the text color.
- ▨ `Font` → Sets the menu text font.
- ▨ `Visible` → Shows or hides the MenuStrip.
- ▨ `Enabled` → Enables or disables the MenuStrip.

■ ToolStripMenuItem

- ▨ `Text` → Sets the displayed text.
- ▨ `Name` → Sets the item name.
- ▨ `Enabled` → Enables or disables the item.
- ▨ `Visible` → Shows or hides the item.
- ▨ `Checked` → Indicates whether the item is checked.
- ▨ `ShortcutKeys` → Assigns keyboard shortcuts.
- ▨ `DropDownItems` → Contains submenu items.

Note

- ◆ `MenuStrip` is the main menu container.
- ◆ `ToolStripMenuItem` represents an individual menu item.
- ◆ `Items` contains top-level items, while `DropDownItems` contains submenus.

✦ Summary

- ✓ `MenuStrip` creates the main menu of a Windows Forms application.
- ✓ `ToolStripMenuItem` represents menu items.
- ✓ `Click` events execute code when an item is selected.
- ✓ `Items` manages top-level menu items.
- ✓ `DropDownItems` manages submenu items.

Thank you 😊
