

The background is a blurred image of a computer monitor. On the left, a sidebar with blue and white elements is visible. The main area of the screen shows lines of code in various colors (green, blue, white) on a dark background. At the bottom, a taskbar with several application icons is visible.

ContextMenu

Definition

ContextMenuStrip

 Windows Forms control that displays a shortcut menu, usually when right-clicking a control.

 Provides actions related to the selected control, such as changing color, changing font, or clearing text.

Procedure

1. Add a ContextMenuStrip to the form.
2. Add ToolStripMenuItem's such as Change Color, Change Font, and Clear.
3. Assign the ContextMenuStrip to the target control.
4. Handle each menu item's Click event.
5. Use ColorDialog and FontDialog to modify the control when needed.

💡 Example

```
textBox1.ContextMenuStrip = contextMenuStrip1;  
private void tsmChangeColor_Click(object sender, EventArgs e)  
{  
    if (colorDialog1.ShowDialog() == DialogResult.OK)  
        textBox1.BackColor = colorDialog1.Color;  
}  
private void tsmChangeFont_Click(object sender, EventArgs e)  
{  
    if (fontDialog1.ShowDialog() == DialogResult.OK)  
    {  
        textBox1.Font = fontDialog1.Font;  
        textBox1.ForeColor = fontDialog1.Color;  
    }  
}  
private void tcmClear_Click(object sender, EventArgs e)  
{  
    textBox1.Clear();  
}
```

➡ Result

Right-clicking textBox1 opens the context menu with actions to:

- ▨ Change the background color.
- ▨ Change the font and text color.
- ▨ Clear the text.

Note

- ◆ ContextMenuStrip is normally used for quick actions related to a specific control.
- ◆ ToolStripMenuItem represents an individual menu item.
- ◆ DropDownItems can be used to create submenu items.

Most Used Properties

-  ContextMenuStrip → Assigns a context menu to a control.
-  Items → Contains the menu items.
-  Text → Sets the displayed menu item text.
-  Enabled / Visible → Controls availability and visibility.
-  Checked → Shows whether a menu item is checked.
-  ShortcutKeys → Assigns keyboard shortcuts.
-  DropDownItems → Contains submenu items.

Comparison

MenuStrip

- ✓ Main application menu.
- ✓ Usually displayed at the top of the form.
- ✓ Used for general actions such as File, Edit, and Help.

ContextMenuStrip

- ✓ Shortcut menu for a specific control.
- ✓ Usually opened with a right-click.
- ✓ Used for actions such as Change Color and Clear.

✦✦ Summary

- ✓ ContextMenuStrip creates a right-click shortcut menu.
- ✓ ToolStripMenuItem represents menu options.
- ✓ ContextMenuStrip property assigns the menu to a control.
- ✓ Click events perform the selected actions.

Thank you 😊
