

The background is a blurred image of a computer monitor. It shows a dark-themed code editor with various lines of code in different colors (blue, green, white). At the bottom, a taskbar is visible with several application icons, including what looks like a web browser, a file explorer, and some development tools. The overall image is out of focus, serving as a backdrop for the text.

C#

Level 1

Get Current Date & Time

C#

Level 1

Get Current Date & Time

Definition

 DateTime.Now

 `DateTime.Now` returns the current local date and time of the computer.

Explanation

Getting the Current Date & Time

 `'DateTime.Now'` gets the current date and time at the moment the code runs.

 The returned value depends on the computer's local time.

Procedures

1. Use ``DateTime.Now``.
2. Store the result in a ``DateTime`` variable.
3. Display or use the current date and time.

💡 Example

```
DateTime dt1 = DateTime.Now;  
Console.WriteLine(dt1);
```

➡ Result

Current local date and time.

Note

- ◆ `DateTime.Now` gives the local system date and time.
- ◆ Unlike `new DateTime()`, it does not return the default `01/01/0001 00:00:00`.

✦✦ Summary

- ✓ `DateTime.Now` gets the current local date and time.
- ✓ The value is determined when the code runs.

Thank you 😊
