

The background of the slide is a blurred image of a computer monitor displaying a code editor. The code is written in C# and features syntax highlighting with various colors like blue, green, and yellow. The text 'C# Level 1 Break Statement' is overlaid on the center of the screen. The 'C#' is in a large, bold, yellow font. 'Level 1' is in a white font. 'Break Statement' is in a large, bold, yellow font. The overall aesthetic is technical and modern.

C#

Level 1

Break Statement

C#

Level 1

Break Statement

Definition

break Statement

-  Immediately terminates the nearest enclosing loop.

-  Stops the loop even if its condition is still true.

Explanation

Using break

 Usually combined with an if statement to stop the loop when a specific condition occurs.

 Once break executes, no further iterations are performed.

💡 Example

```
int i = 1;
do
{
    Console.WriteLine(i);

    if (i == 3)
        break;
    i++;
} while (i <= 5);
```

➡ Result

C# while Loop: Iteration 1

C# while Loop: Iteration 2

C# while Loop: Iteration 3

Note

- ◆ break can be used with for, while, and do...while loops.
- ◆ It exits only the nearest enclosing loop.

Comparison

Normal Loop Ending

- ✓ Loop continues until its condition becomes false.

break

- ✓ Stops the loop immediately when reached.

✦✦ Summary

- ✓ break terminates a loop immediately.
- ✓ It is commonly used with if.
- ✓ It can stop a loop before its normal condition becomes false.

Thank you 😊
