

The background is a blurred image of a computer monitor. It shows a dark-themed code editor with various lines of code in different colors (blue, green, white). At the bottom, a taskbar is visible with several application icons, including what looks like a web browser, a file explorer, and some development tools. The overall image is out of focus, emphasizing the text overlay.

C#

Random Function

C#

Level 1

# Random Function

# Definition

## Random Number Generation

-  Random is a *C#* class used to generate random numbers.
-  Next(min, max) generates a random integer within a specified range.

# Explanation

## Range Rule

-  min is included.

-  max is excluded.

-  Next(10, 20) can return values from 10 to 19.

## Random Object

-  Create a Random object before generating numbers:

-  Random rnd = new Random();

# Procedure

1. Create a Random object.
2. Call Next(min, max).
3. Use the returned random integer.
4. Calling Next() multiple times can produce different values.

# 💡 Example

`rnd.Next(10, 20)`

➡ Possible values:  
10, 11, 12, ..., 18, 19

## Note

- ◆ The maximum value is never included.
- ◆ In a loop, Next() can be called multiple times to generate several random numbers.

# ✦✦ Summary

- ✓ Random generates random numbers.
- ✓ Next(min, max) generates a random integer.
- ✓ min is included.
- ✓ max is excluded.

Thank you 😊
